

ENDOSCOPY NURSE FELLOWSHIP

The Endoscopy Nurse Fellowship program is an opportunity for both new graduate and experienced RNs who are interested in a career in endoscopy.

The fellowship program is sixteen weeks, which includes didactic content and a clinical orientation under the guidance of a skilled preceptor.

Through this program, participants will learn how to function in the pre-procedure, phase I and phase II recovery roles, as well as the procedural assistant and circulator roles. RNs will also learn endoscope reprocessing.
